

STICKY STUFF REMOVER™

#660 5.5oz aerosol can sugg retail \$7.49

THE BUILDING CONTRACTOR & DO-IT-YOURSELFer's BEST FRIEND

EVERY Household & Business NEEDS a can!

Natural citrus solvents in this Amazing product get rid of stains like pen ink, crayons, lipstick, asphalt, tar, oil, rubber cement, glue sticks, bumper sticker glue, scuff marks, graffiti, and more. A necessity for every household, especially anyone with kids. This product is an excellent example of "The Fuller Difference"; it does the job right the first time. Pleasant orange scent.

Our Sticky Stuff Remover was featured on TV with some fantastic demos. It dissolves those darn price tags and glue off the things you buy, including labels on new windows. It even got lipstick off a white shirt. They put a piece of duct tape on a facial tissue, sprayed Sticky Stuff Remover on the back, and then peeled the tape off without tearing the tissue!!! Seeing is believing with this or any other Fuller Brush product.

"Removed permanent magic marker from my kitchen table (kids!) without scrubbing. I also had a campaign sticker that would not come off my nylon jacket. I finally got the paper off, but the glue was still there. Sticky Stuff removed it easily and my jacket looks like new again." - R.R.

"Removes chewing gum and most anything the kids can dish out from schoolbus seats, floors, walls. It also removed mascara from a carpet." - Pat J., schoolbus driver

"I got silicone caulking/sealant on my hands installing and sealing a new window, that nothing will get off. Just spray Sticky Stuff on your hands and rub together and rinse under the faucet. Everything comes off like new. Hands smell nice too." - R.R.

Do It Yourselfer Lynda B has a number of testimonials and wouldn't be caught without a can nearby. Whenever she has a problem she says "I bet Sticky Stuff Remover will fix it". She got spray paint (not latex) on her hands and sprayed Sticky Stuff Remover on her hands, rubbed together, and rinsed it all off! She was also repairing the seal around a chimney at camp (where she also keeps a can) with roofing tar and got it all over her hands. Sticky Stuff did it again. "I also got lacquer paint on my hands and then discovered I had no lacquer remover. I sprayed my hands with Sticky Stuff Remover and it all came off easily. That's MUCH better than using stinky gasoline or paint thinner on my hands." And another one. "I got BIN sealer paint [like KILZ - nothing removes it] all over the front of my shirt when I leaned into it. It dried all stiff so I couldn't even wear it for more painting. So I used my solution for everything - Sticky Stuff Remover - and it removed the paint and it's as good as new again."

"Removed the dryer-stuck stickers my daughters put on their clothes (and the adhesive!), and dryer-stuck gum from a dress. Thank you for all the money you saved me on new clothes." - B.B. "I bought Sticky Stuff Remover because my daughter had left gum in the pockets of her jeans and it was all stuck on after going through the laundry. Sprayed it on, waited the 30 seconds as instructed, rubbed with a brush. Gum was gone! It had started working even before I rubbed it off. Fuller Brush products are fantastic!" - Patty Z

"Removes chewing gum from kids' hair, clothes, and shoes, and crayon marks. Removes driveway sealer tracked onto my kitchen floor, and tar from my husband's clothes." - S.F.

"I am amazed at the power of Fuller's Sticky Stuff Remover. My 2-year old put an ink cartridge from a pen into his sleeper. The ink soaked into the sole of the foot of the sleeper. We had 2 dozen ink spots on our beige carpet before we realized where the black stains were coming from. The Sticky Stuff took out the ink spots not only out of the carpet, but the sleeper too!" - K.

Sticky Stuff removed messy duct tape adhesive easily. And a friend's tan car had green paint from a fender bender. She "tried everything" to remove it. One quick spray of Sticky Stuff and it wiped off easily. - RR

Safe to use on Nylon, Polypropylene plastics, wool carpets, cotton clothes, vinyl baseboards, vinyl floors, laminated countertops, all metals, brick, wood, concrete, grout, vinyl tops, fabrics, fiberglass. Recommendations: Best when used with a dry cloth or paper towel. Fuller's aerosols have no CFCs harmful to the ozone layer.

Does not remove white glues, wood glues, candle wax. Do not use on varnished or painted surfaces or on styrene (brittle) plastics. Will also soften or remove floor finishes. *Mfr in Kansas.* Compiled by FB-DWT rev3/09
